<u>Sunday Morning Tech Team Positions</u>

<u>Audio Team</u>

FOH (Front of House): The FOH runs the mixing board located in the Auditorium and controls the audio mix that the audience hears.

BOH (Back of House): The BOH runs the pro-tools audio mixing center located in the back offices and controls the audio mix that the online and campuses hear.

<u>Lighting Team</u>

Lighting Director: The lighting director will sit out in the main tech booth in the Auditorium and follow along with the service order and run the lighting cues at the correct time.

<u>Video Team</u>

Video Director: Responsible for what is shown on the video screens and online during the Sunday Service. They are also responsible for what is shown to the campuses during the message portion of the service.

Assistant Director: Integrates camera feeds, video playback, and graphics into a seamless presentation. They will be executing commands given by the video directors to control what is being sent to the video screens, online, and campuses.

Camera Operator: Operate camera for music and/or message portion of the worship service. This may be stationary cameras, roaming (stage) cameras, and the jib (boom) camera.

CG Operator: Edit and run all song lyrics for the worship service. You will also run all graphics, name titles, and message slides. You will run through songs live with the band during rehearsal

Direction

Technical Director: Overseas the set-up and operation of the tech equipment on Sunday. You will also troubleshoot and equipment problems that might occur.

Producer: Helps lead the tech team on Sunday. You will cue different tech areas during the Sunday service as needed. You will make sure the service timing is on schedule and help adjust as needed.

Stagehands: Moves speaker props, visual aids, mics, staging, etc. on and off stage when needed. Helps keep backstage orderly and safe.

Service Control: Help input the service timing into Resi to the other campuses are aware of where we are at in the service. You will also be controlling the Planning Center Live feature that will keep the whole tech team on time with the service by giving them a heads up to what is happening and when.
